Summary

Computer Engineering graduate building Android apps with Kotlin and Jetpack Compose and full stack web apps with Next.js, TypeScript and PostgreSQL. Two internships, TÜBİTAK 2209-A Project Leader, Erasmus+ in Portugal.

Experience

Founder and Software Developer, CineMention – Remote Aug 2026 – Present

- Founded and solely develop a film discovery social platform: Next.js web app live with 30+ users, Kotlin Android app in closed testing, one Supabase (PostgreSQL) backend.
- Implemented 140+ web pages in Next.js, React and TypeScript, including swipe recommendations, taste matching, clubs and messaging, with Turkish and English localization and PWA support.
- Structured the Android app (Kotlin, Jetpack Compose, Hilt) into 25 Gradle modules with Google sign in, Firebase push notifications and 119 Kotlin test files (Robolectric, Roborazzi screenshot tests).
- Designed the database across 160 versioned SQL migrations and set up unit tests (Vitest), end to end tests (Playwright), Docker builds and GitHub Actions CI.

Software Intern, Demiray Software – Kütahya, Türkiye Apr 2026 – Jun 2026

- Built a multi tenant messaging service (Python, FastAPI, MongoDB), live in the booking product RandevumOnline, that takes appointments through a 6 screen, end to end encrypted WhatsApp Flows form.
- Wrote the availability engine that computes open slots from working hours, staff leave, bookings and rooms.
- Added an Instagram DM assistant (Groq, tool calling) that answers from business data, books appointments and hands off to staff.
- Developed a geofenced attendance system, live in RandevumOnline, with a Next.js map panel, a Kotlin and Jetpack Compose app reporting location from a foreground service, and push alerts.

Android Developer Intern, Bimser – Kocaeli, Türkiye Aug 2024 – Sep 2024

- Created an internal task tracking Android app (Kotlin, Jetpack Compose, MVVM, Hilt) with task, status, assignee, messaging and profile screens, connected to company REST services via Retrofit.

Projects

AYİKA · Emergency Aid and Needs Coordination Network Mar 2024 – Jun 2025

Project Leader · TÜBİTAK 2209-A Research Project Support Programme for Undergraduate Students

- Led a three student team on a TÜBİTAK supported aid system designed for 100+ users; final report accepted.
- Engineered the React and TypeScript admin panel on a Django REST Framework and PostgreSQL API, and a Flutter app mapping aid points in all 81 provinces with GPS nearest point search.

Montanha Viva Dashboard Feb 2025 – Jul 2025

Full Stack Developer · Universidade da Beira Interior, Erasmus+ semester project

- Delivered a React, TypeScript and Django REST Framework platform with IoT charts, QR rewards and JWT auth.
- Trained a YOLO (Ultralytics) plant identification model, served via a Django REST endpoint with confidence scores.

Education

Kütahya Dumlupınar University, B.Sc. in Computer Engineering – Kütahya, Türkiye Sep 2022 – Jul 2026

Universidade da Beira Interior, Erasmus+ Exchange, Informatics Engineering – Portugal Feb 2025 – Jul 2025

Certifications

- **TÜBİTAK BİLGEM YTE Bootcamp 2023 (Online, Oct 2023):** Java, Spring, Microservice Architectures, UX, Figma

Technical Skills

Languages: Kotlin, TypeScript, Python, Java, Dart, SQL
Mobile: Android, Jetpack Compose, Hilt, Retrofit, Coroutines, MVVM, Flutter
Web and Backend: Next.js, React, Tailwind CSS, Material UI, FastAPI, Django REST Framework, Supabase, REST APIs
Data and Tools: PostgreSQL, MongoDB, Vitest, Playwright, pytest, Docker, GitHub Actions, Git, Figma
AI: Claude Code (daily), LLM tool calling (Groq), YOLO model training (Ultralytics)
Spoken Languages: Turkish (native), English (B2)
